International Placed Second In First Aid

Mine Rescue and First Aid Competitions Held At Blairmore, July 1. Blairmore Won First In Mine Rescue.

International first aid team was nosed out by two points in the senior First Aid competition held by the C.N.P. Mine Rescue and First Aid Association at Blairmore on July 1.

Personnel of the local team: Lor. Richard Jr., captain, Hartley Dunlop, Jim Kilgarnon, Gerald Clarke, Richard Gerard, patient and Dick Greenhalgh, coach.

The team had practised faithfully for the past several weeks and while they definitely would have liked to have been the winners they are well pleased with their showing. They received pocket books for prizes.

Greenhill mine team of Blairmore placed first in the mine rescue competition. The Bellevue team placed second and Hillcrest Mohawk third.

Winner of the senior first aid contest sponsored by the association was the Canmore mine with the International Mine, Coleman, second, and the Greenhill mine, Blairmore, third.

The junior first aid contest was won by Bellevue with Blairmore and Hillcrest in second and third place.

Judges for the events were: Mine rescue, H. Blake, Blairmore; W. Wilson, Canmore; L. McDonald, Coleman; Evan Morgan, Lethbridge; senior first aid, J. Owen, Michel; Dr. J. M. Hutchinson, Ald. E. H. Starr and Dr. L. Hill, of Calgary; junior first aid, R. M. Greenhalgh, Coleman, A. Marks, A. McKay, Blairmore, H. Millar, Bellevue.

Following the contest the winning teams were guests of the association at a smoker.

TO MARK CORNER LEADING TO BRITISH COLUMBIA

The volume of tourist cars that are missing the turn in west Coleman leading to British Columbia has reached such proportions that the council this morning decided to paint a yellow centre line on the curve and paint in large letters the words "British Columbia" along with an arrow.

There is a British Columbia sign at the curve, but too many tourists are failing to notice it and go straight ahead. It is reported that tourist traffic through the Pass is the heaviest in years.

DECORATION DAY

All members of Coleman Elks Lodge No. 117, are requested to meet at the I.O.O.F. Hall on SUNDAY, JULY 7th, at 10 a.m., to march in a body to the local cemeteries where the graves of departed members will be decorated with plants.

J. M. RUSHTON, Secretary.

AUSTRALIAN WEDDING

Pictured above is Mr. and Mrs. Trevor A. Collister, nee May Ramsay, whose marriage took place recently at Rozelle, N.S.W., Australia.

The groom was a Flying Officer with the R.A.A.F. and was attached to the R.A.F. He took his training at No. 15 S.P.T.S., Claresholme, and was posted overseas in May, 1943. Up until his recent discharge he served most of his flying time in Burma.

The bride served three years and nine months in the R.C.A.F. (W.D.) being stationed during that time at Claresholme, Ottawa and Upplands, Ontario, receiving her discharge in December, 1945.

The bride served three years and nine months in the R.C.A.F. (W.D.) being stationed during that time at Claresholme, Ottawa and Upplands, Ontario, receiving her discharge in December, 1945.

Memorial Park Fast Becoming A Beauty Spot

Citizens Have Contributed Plants; Bowling Greens Still Being Nursed Along.

Coleman's Memorial Park is fast being brought into shape. Workers George Derbyshire and Ray Steubnaut on Wednesday afternoon were busy working on an unplanted section of the park but the balance looked fresh, cool and green with sprinklers playing over various sections of the bowling greens which are being nursed along with loving care.

A number of citizens have contributed bushes and plants and the latter are now in bloom giving the park a beautiful appearance. Rocks bordering the walk have been painted and lead up to the point where it is planned to erect the Copatoph.

Acknowledgement is made to M. W. Cooke and John McQuarrie for plants and to Ellis Derbyshire for the use of his car to gather plants.

The three bowling greens have shown improvement this spring and summer and while it is doubtful if play will commence on them this year bowling in Coleman should be a certainty next year. In fact the Legion executive are already after bowls and have corresponded with the Calgary Bowling club on the subject.

The Bingo on the hour prizes met

BERNARD McDONALD HOME

Bernard McDonald arrived home on Wednesday evening from overseas. He came back with one of the largest groups of Canadian soldiers to return to Canada in recent months. Beyond being a little more sun tanned, Bernard hasn't changed a bit. "It's sure nice to be home," he grinned when welcomed back home by some of his friends.

Coleman Soft-Ballers Won 1st At Blairmore

Beat Out Cowley And Blairmore To Win \$50 Prize; To Enter Provincial Play-Offs.

Coleman Softballers won them selves a reputation and a \$50 cheque on the side at the week end.

On Sunday in an exhibition game they walloped Blairmore 6-2 behind the sterling pitching of Bill Skura.

On July 1 the team entered the Blairmore softball competition. Six teams were entered. The locals down Cowley in the first round and hung an 8-1 defeat on them with Alex Kovack doing the hurling. In the final they came once again face to face with Blairmore. It was the old story. Bill Skura kept his opponents helpless while his teammates gathered in six runs to win handily 6-3. The final was worth \$50 to the Colemanians.

On Sunday next Coleman travel to Fernie where they will tangle with the Fernie Teen-Towners at 6 p.m. The Fernie team has whipped every team so far and have entered the little world series to be played at Vancouver. Only BC teams are eligible. They won first money at Michel on Monday.

Coleman will also enter the provincial play-offs which are scheduled to start later this month. Their first round opponent is expected to be Medicine Hat in home an home games.

Mrs. Krzywy And Geo. Booth Carnival Winners

Crowd in Attendance
Each Evening; All Booths Given Good Play.

Coleman Elks sponsored another successful carnival Saturday and Monday last when crowds from Coleman and Pass towns crowded into the arena.

The two big winners of the \$50 bonds were Mrs. Steve Krzywy, on Saturday night and George Booth on Monday night.

The Bingo on the hour prizes met with favor and today six men are proud possessors of men's dressing sets. The doll and blanket booths were perhaps the best played booths of the carnival with the exception of the Crown & Anchor.

The carnival committee is pleased with the support accorded them by the public and have added another fairly substantial amount to their building fund.

On the present time there was a lull in the fighting. We fought the war of 1914-18, experienced a 21 years lull then fought again the 1939-45 war. No one was quite sure that we were again experiencing another lull to be followed by another war," stated Col. Snow. "It had taken Canada three years before she was ready to send her first division into Sicily" stated her speaker.

His office had been working hard to cut the red tape in order to get the Pass unit properly started but no sooner had one obstacle been hurdled than another got in the way.

Two large workshop lorries had been received by his office at Calgary and were destined for the Pass just as soon as a compound could be made ready to receive them.

The master of huts was another question and he was at present working on it.

"An estimated cut in the budget was almost certain to interfere with the appropriation for Canada's armed forces," stated Col. Snow.

"He praised highly the cadet training, stating it was the best training there is today. He called for the support of the school teachers, whom he described as one of the worst paid groups in the community, and also the support of the parents in making Cadet training a success.

Various members of the committee spoke, all of whom stressed the point that until there was equipment right here in the Pass to train the men it would be useless to conduct recruiting campaigns.

Work Report Of The Junior Red Cross

From September 1945, to June, 1946.

Money donated to the Crippled Children's hospital, \$62 plus \$25, total \$87; Service Fund, \$12 plus \$25, total \$37.

To the Nursery in England (the Junior Red Cross branches of Alberta are responsible for all the clothing of twenty small children from two years to six years) we sent four toys, Mickey Mouse, Donald Duck, Bambi and Pluto. We had letter from the Matron of the Nursery and the children.

Other activities were: Magazines and playing cards to the Reception Centre, C.R.P.R. platform.

Cribbage boards and playing cards to the Belcher hospital and Keith Sanitorium. Flowers and eggs to the Coleman hospital; 30 dozen eggs to the Crippled Children's hospital.

Money sent to help the Milk-for-Britain Fund and Queen's Air Raid Fund.

We helped with the salvage and UNRRA Clothing Collection and helped to collect funds for the senior Red Cross.

We wish to thank all our friends for their generous help — magazines; in the sale of calendars; Mike Hutchek for the playing cards; Mrs. Krzywy for toys; Mr. Allan for the use of his truck; the on school.

We had the honor of being asked to write the introductory letter to "News Letter" of the Junior Red Cross issued at provincial headquarters, Calgary, for the June issue.

Our letter reads:

"We, the Junior Red Cross branch of Conneron school, have been given the privilege and honor of sending greetings to all the Juniors of Alberta.

"We are the OLDEST ACTIVE BRANCH in Alberta and after twenty years of experience should know something about the joy of doing Junior Red Cross work. There is no surer way of helping children to become good citizens of Canada, of Alberta, of a home community, than by teaching them to live up to the Pledge of the Junior Red Cross.

"We have become an organization of importance and it is our duty to do all in our power to make the world a better and happier place for the less fortunate.

"In our branch we have many representatives of European countries so it has been an added incentive to help the home lands of the parents. We have considered it our duty to take part in all Junior Red Cross undertakings and in addition several enterprises of our own—Milk-for-Britain and parcels to our former pupils who were members of the 'Cameronian'."

"Now that we are over our responsibilities have increased and great numbers of undernourished children have to be supplied with food. This is our job and we must continue this work until there is no longer any suffering.

Pupils of Grade VIII, Cameron School, Coleman."

"From This Day Forward"

Joan FONTAINE

He couldn't give her anything but love...and that was okay with Susie. She thought marriage meant love & laughs.....Forgot it meant bread and butter, too!

Orange Bread

1 cup sifted pastry flour
3 cups sifted powdered sugar
1/2 cup shortening
1/2 cup orange juice
1/2 cup orange peels
1/2 cup melted butter
1/2 cup milk
1/2 cup beaten egg
1/2 cup packed shredded
shortening, and well beaten
dry ingredients, orange rind. Add milk, melted
shortening, and well beaten egg. Mix quickly and
lightly with dry ingredients. Pour into greased loaf pan. Stand
15 minutes. Bake in 350° oven 1 hour.

Serve with "SALADA" TEA

A Powerful Force

SINCE THE FIRST ATOMIC BOMB was dropped on Japan the attention of the world has centred a great deal of the time on the potentialities of atomic energy and its possible effect on the future. The discovery of this new and powerful force was one of the greatest milestones in history and thoughtful people everywhere realize that it has brought a new era in the affairs of man. Used as a weapon of destruction it could most completely wipe out the civilization which has been built up through the centuries and this possibility has added to the earnest desire felt in all countries for the elimination of differences between nations and the assurance of lasting peace. Never before in the history of the world has the alternative to peace been so terrifying.

The Centre Of Many Problems

The Canadian Institute of International Affairs recently released an interesting pamphlet in which the relation of atomic energy and world government was discussed. The writer is Dr. Leopold Infeld, a noted Polish physicist and mathematician, and a former colleague of Einstein. He is now a professor of mathematics at the University of Toronto. Dr. Infeld points out that atomic energy is a problem that is now, and will for many years to come, be the centre of all technical, social and economic problems. This is a broad statement, but it is already clear that atomic energy is in some way connected with many of the most pressing problems of our times. The possibilities of its practical applications are many, and they may in time revolutionize many of our present practices and be of great benefit to all mankind.

May Mean Either Life or Death

When atomic energy is applied to industry, Dr. Infeld suggests that the world will face a revolution much more far-reaching than that which came with the invention of electric power. The full development of atomic power suggests factories run by control machinery only, which would mean a reduction in the amount of labor required, and consequent far-reaching social and industrial changes. Such uses as that at present appear to remote, and its applications to war are much more real. Problems of international relations are now more important than they have ever been before for, as Dr. Infeld concludes, the results and compromises achieved in this field may mean the difference between life and death, not to one nation alone, but of our entire planet."

Living Longer

Life Expectancy In The United States Has Greatly Increased

In 1944, for the first time in our history, the average length of life (expectation of life at birth) of the American people, including military personnel within the country, exceeded 65 years. The actual figure, 65½ years, is almost 16 years greater than at the beginning of the century.

As a result of this truly remarkable gain, the person of age 20 years has, on an average, as many years of life ahead as the newborn child had in 1920. Even more striking is the observation that, whereas according to the earlier mortality only three-quarters of the babies would attain age 25, under present conditions three-quarters of them will reach age 57.

For white females in 1944, the average length of life was 68.9 years. White females who have attained their first birthday anniversary will live, on an average, to age 71. For those who have attained their 49th birthday, the figure is 75 years.

The increase in longevity among white females in 1944, as compared with 1943, was two-thirds of a year. It was more than ten years over the average figure for 1919-1921, and almost 18 years over that for 1900-1902.

Although white males in 1944 reached a high level of 63.55 years in average length of life, their record was a little below the peak attained in 1942. The chief factor in this slight setback is the relatively high mortality from accidents among men in the military services. The gain in average length of life among white males since 1900 amounted to 15½ years—Metropolitan Life Building.

Reward For Inventors

For Use During The War Of Designs And Processes

A Royal Commission is being set up to decide what awards shall be given to inventors for use during the war of their "inventions, designs, drawings or processes" by British and Allied Governments.

Later the commission will arrange the procedure for submitting claims. Government employees will not be excluded from compensation for inventions but their contributions will be judged on the same footing as outside work.

American royalty rights on inventions will also be taken into account.

EXAMPLE TO WORLD

British Commonwealth Has Experience For All Who Care To Learn

Mr. Vincent Massey, late Canadian High Commissioner in Britain, in his last public address before giving up that post:

"The British Commonwealth is today an example to the world which is running a race with catastrophe and which is looking so desperately for grounds of mutual understanding. The Commonwealth has reservoirs of experience for all who care to learn from it.

One lesson which we can pass on to the fledgling United Nations is that of patience. The harmony of freedom and co-operation which we enjoy is best maintained without strife and battles. Another hard lesson which I believe has to offer is that institutions can be built successfully only when they are founded on aspirations. No such bond yet exists between members of the United Nations; they must be given every encouragement to agree. That will take time, and until then the Commonwealth cannot relax its vigilance.

The great inheritance which all of us in the Empire share has been fed from many streams. But the source from which our ideals have been spread out all over the world has been England; and although her daughters are beginning to undertake larger tasks Britain is still first and foremost.

How urgent a need there is today for all that she can offer the world in leadership and guidance! If civilization would have perished in 1940 without British valor and British skill—as it would—today without the qualities which belong to Britain it will just as surely lose its way.

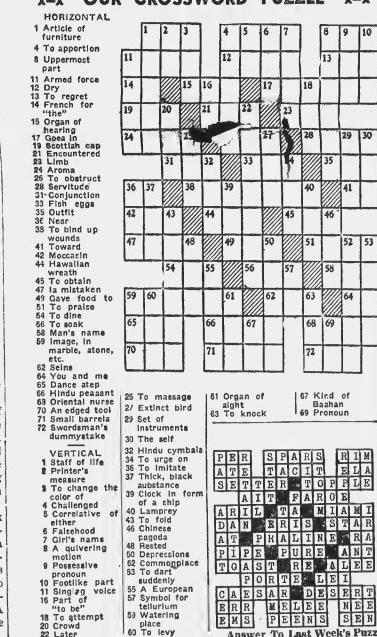

FOR INDIAN NAVY

Three cruises of the famous "Leander" class, which defeated the pocket battleship Graf Spee in 1939 to be acquired by the Royal Indian Navy, with the agreement of His Majesty's government, Indian personnel for manning the warships will be trained in the United Kingdom.

RENEW WATER IN LAKE LONDON

EIGHT million gallons of water were needed to fill St. James' Park lake—emptied during the war.

The body of Daniel Tessier, Dalton Mills trapper, murdered in the north, examination. Tessier was found near his Jackpine river home with a bullet in wicker basket, was flown to Sudbury in this plane for post-mortem hole behind the right ear. Police say he was shot from ambush.

Price Control And Rationing Information

WINTER WHEAT Continues To Attract Attention In Southern Alberta

Winter wheat continues to attract increased attention in Southern Alberta. The two chief reasons of this are the premium paid for winter wheat and the scarcity of farm labor. Previous to the war, winter wheat usually sold at a discount of from five to ten cents per bushel below spring wheat, but during the years it has commanded a premium of ten cents per bushel. Many farmers who have little or no labor find that winter wheat helps considerably in solving their labor problem, so it usually ripens about two weeks earlier than spring wheat.

At the Dominion Experimental Station at Lethbridge winter wheat has been under test continuously since the station was established in 1907. In a rotation that was commenced many years ago Kharakov winter wheat has given an average yield of 27.3 bushels per acre over a 28 year period, as compared with 25 bushels per acre for Marquis under the same conditions, and only one complete harvest occurred from winter sowing during that period.

Kharakov, preferably the Kharakov M.C. 22 strain, is still one of the best varieties. Yogo is also a good variety. Many farmers prefer a beardless variety and generally choose Jones' Fife (often called Velvet Chaff). This variety yields well and frequently gives good results under ideal conditions, but it shatters readily and is definitely less winter hardy than the other two varieties mentioned.

The first week in September appears to be the best time to seed winter wheat in Southern Alberta. Earlier seeding gives the ground more protection against wind erosion but when sown too early damage from root rot usually occurs.

Atomic Bombs

United States Has Developed Long Range Planes To Carry The Load DETROIT.—The United States has developed a bomber capable of flying from this country "to drop an atomic bomb on any industrial center in the world," said W. Stuart Symington, Assistant Secretary of War for Air.

"If we can do it," he said, "others can do it to us."

An address to the Economic Club of Detroit, Symington revealed for the first time the full capabilities of the Army Air Force's new B-36 bomber and the recently unveiled B-35. Both, he said, can fly 10,000 miles with a atomic bomb.

With atomic planes in the air, he pointed out, "the Polar paths of air routes will be more important than any others."

In addition to atomic bombing operations made possible by the new long-range planes, Symington said, the blueprint for the post-war U.S. Air Force also will emphasize the value of guided missiles and rockets for attacks of atomic bombs.

Symington warned, however, against "too much economy" in planning future American air power and charged that there already was "the same old talk" about restricting the U.S. Air Arm.

SCOUTS NEEDED

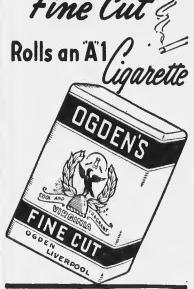

The Boy Scout movement is needed more than ever before, to improve the sentiment and good feeling between all races, Viscount Alexander, Governor-General of Canada, said at the annual meeting of the Canadian General Council of the Boy Scouts Association.

TOP PILOTS
British Overseas Airways Corporation has a name for 52 of its pilots—"milkage millionaires." Each has flown more than 1,000,000 miles.

GEMS OF THOUGHT

OGDEN'S Fine Cut Cigarettes

L.P. MEMBER SENTENCED—I have done nothing against the people of Canada and I still insist that I am innocent." After saying these words, Fred Rose, Labor-Progressive M.P. for Montreal-Cartier, was sentenced to six years in penitentiary for conspiracy to transmit secret information to Russia.

Medical Services

For Indians And Eskimos To Be Improved

Improvements in medical services for Indians and Eskimos were urged in the Commons by John R. MacNicol (PC, Toronto-Davenport) during consideration of health estimates.

Mr. MacNicol welcomed an increase of \$1,577,390, from \$2,526,000 to \$4,103,390, in this year's appropriation for such services. He said he was interested in "real change for the better" and suggested the establishment of a small hospital near reservations.

He also recommended that the teachers in Indian schools be given a course, possibly during the summer holidays, in first aid. This would enable them to tend minor ailments and injuries for the Indians.

Threat To Shipping

Estimate Places Japanese Mines Adrift To Pacific At \$0.000

An estimated 30,000 Japanese mines afloat in the Pacific have been classified as a continual threat to shipping by Rear Admiral Arthur D. Struble, commander of the Pacific amphibious forces.

Simultaneously, the Star-Advertiser said six ships, including five American vessels, had been damaged by mines since V-J Day and that stray mines had been sighted in Hawaiian waters and one only 600 miles off San Francisco.

RIGHT OR WRONG?

Man kind had wished for what is right, they might have had it long ago.—William Hazlitt.

It has been said of the world's history hitherto that might makes right. It is for us and our time to reverse the maxim, and to say that right makes might.—Abraham Lincoln.

God reigns, and will "turn and overturn" until right is found supreme.—Mary Baker Eddy.

So let it be. In God's own might We gird us for the coming fight, And, strong in Him whose cause is ours

In conflict with unhol powers, We grasp the weapons He has given, The Light, and Truth, and Love of Heaven.—Whittier.

Nothing but the right can ever be expedient, since that can never be true expediency which would sacrifice a greater good to a less.—Whately.

No man has a right to do as he pleases, except when he pleases to do right.—Simmons.

ELECTED PRESIDENT

WINNIPEG—N. M. Bentley of the Alberta school of agriculture, Vermillion, was elected president of the western Canadian society of agronomy at the closing session of a two-day conference.

BUDGET BROUGHT DOWN BY FINANCE MINISTER MEANS LOWER TAXES FOR MANY

OTTAWA.—Finance Minister Isley announced to the commons tax changes lifting from more than 550,000 Canadians the burden of paying taxes personal income taxes and easing the load for the taxpayer generally but said this relief does not take effect until January 1, 1947.

That, Mr. Isley told an expectant house and nation in his first post-budget speech, is the date upon which the government proposes to put the far-reaching taxation amendments, involving increased exemptions and revisions, into force.

Until then there will be no change in personal income tax rates.

In brief, Mr. Isley estimated the over-all effect of the proposals will be to reduce income tax revenues for a full year, assuming the present level of incomes by approximately \$143,000,000, or about 23 per cent. These reductions will be in addition to the flat 16-per-cent reduction in personal incomes taxes in the last budget.

By the raising of exemptions, tax-payers immediately above the new exemptions will have their taxes reduced by 50 to 75 per cent, with this scaling down to approximately 10 to 15 per cent. for the majority of taxpayers.

Here are the main proposals:

1. Exemptions for married persons to be raised from \$1,200 to \$1,500.

2. Exemptions for single persons to be raised from \$600 to \$750.

3. All children to be classed as family allowances recipients for personal income tax purposes.

4. Flat deductions of \$100 to be allowed from income for each child eligible for family allowances.

5. Flat deductions of \$300 to be allowed from income for each dependent over 16 and not eligible for family allowances.

6. Taxation of husband and wife will be placed on more equitable basis.

7. Board of tax appeals to be established to hear appeals from in-

come tax assessments for 1946 and succeeding years.

8. Complete overhauling and simplification of personal income tax structure proposed.

9. Farmers and fishermen to be allowed to pay tax on the basis of their average income over a three-year period.

10. Members of the armed forces to be treated for tax purposes on the same basis as civilians except those serving in the western hemisphere who have not gone into the permanent forces by Jan. 1, 1947.

11. Special provisions relating to mercantile marine to be withdrawn at the end of this year.

FOR SEA CADETS

Training Centres Are To Be

Established In Every Province

OTTAWA.—Training centres for the members of the Royal Canadian Sea Cadet corps are to be established in every province throughout the country. Hon. Douglas Abbott, minister of nation defence said in the house.

In Manitoba the training centre will be at Ruttan near Kenora and in Saskatchewan on Shepley Island, an island in the Saskatchewan river near Saskatoon.

The minister made the announcement during consideration in committee of amendments to the Naval Service Act which will permit the sea cadet corps to become a permanent part of the royal Canadian naval service. The bill was given third reading.

High praise for the work and value of the Royal Canadian Sea Cadet corps was voiced by many members.

J. R. MacNicol (P.C., Davenport) said the training the boys in that corps received showed results during the war.

North American reindeer are gregarious like sheep, graze somewhat like cattle, and in intelligence and activity resemble horses.

CANNOT BE LASTING PEACE UNTIL NATIONS UPHOLD LAW SAYS RT. HON. ANTHONY EDEN

OTTAWA.—"We are convinced that there cannot be lasting peace until the nations accept and uphold a rule of law and we are most of us prepared for some merger of sovereignty, to make possible that rule of law," Rt. Hon. Anthony Eden, foreign minister, told the Canadian branch of the Empire Parliamentary Association in Ottawa.

He was referring to relations between the major powers in the world today, the United Kingdom, the Soviet Union and the United States, and the "immeasurable gain to the world" if true understanding and loyal collaboration could be established between the three nations.

Despite the anxieties and dis-

pointments of the present period he was not a pessimist for the future of international collaboration, he said.

"If we put first things first, if we hold to our faith, not as a threat to others but as our own daily and abiding inspiration, if we make plain to ourselves that neither our faith nor our friends are exacting and that the doors are open to all, if we are firm but cool and reasoning, we shall win through. Even the clouds are heavy and sultry. But we have faced worse odds than these, we shall yet reach the sun-splashed lands beyond."

He added, "there is, as I believe, no major power on this earth today and that is in a position to make war and that has it in its heart to do so."

RETAIN RANK

Announcement Made At Ottawa In Reference To Reserve Men

OTTAWA.—Defence headquarters announced war veteran officers and non-commissioned officers could retain their rank in the reserve army.

The announcement explained:

"In reorganizing the non-permanent active militia as the reserve force, it is desirable that the knowledge and experience of wartime soldiers be made available to reserve units and authority therefore has been granted for such units to carry, in certain specified ranks and numbers, ex-active service personnel supernumerary to the authorized establishment."

Officers, W.O.'s and N.C.O.'s with actual battle experience will be given preference and those selected may carry the substantive rank they held at the time of discharge.

HECKLING BANNED

Members Of Japanese Diet Decide Against Stormy Sessions

TOKYO.—Representatives in the lower house of the Japanese diet have agreed to ban heckling and shouting in the future as a measure of self-censure for a recent uproarious session.

It was agreed that legislators especially should never shout "baka!" (idiot).

The word was used frequently during a stormy meeting when members swung at each other and spectators screamed in the galleries.

THREAT REMOVED

LONDON.—Walter Nash, deputy prime minister of New Zealand, said in a broadcast that the threat of aggression in the Pacific had been removed for half a century and, it was hoped, forever, because of the defeat of Japan and the "enormous" naval air power of the United States.

The threat was believed to have been done during a severe storm which struck The Pas June 9.

FOREST DESTROYED

Game Patroller Thinks Cyclone Caused Damage Near The Pas

THE PAS Man.—Game patrols

Jed Read of The Pas said he

had come across an area of timber, about $\frac{1}{2}$ mile square, which had apparently been devastated in a cyclonic storm. He said not a tree remained standing and in many cases the trunks even had been shredded.

The damage is believed to have been

done during a severe storm which

struck The Pas June 9.

RATION COUPON CHARGES HAVE BEEN LAID AGAINST BANK EMPLOYEES IN QUEBEC

OTTAWA.—Robert Mayhew, parliamentary assistant to Finance Minister Isley, disclosed in the commons that "at least" four employees of the Bank of Provinciale du Canada are under arrest on charges of "black marketing" in connection with ration coupons held by the bank.

Mr. Mayhew, making a statement requested earlier by John Diefenbaker (P.C.—Lake Centre), said three of those held had admitted their guilt and added that more than one branch of the bank, which operates in Quebec province was involved.

The arrests are made in connection with "black marketing" which led the prices board to announce earlier that it was cancelling its ration coupon banking arrangements with the bank at the end of July.

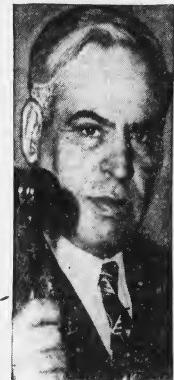

The type of ration coupons involved was not disclosed.

Mr. Mayhew said it was impossible to state the ramifications of the black market operations but they did involve merchants as well as bank employees.

Nor could he say how long they had been going on because this might prejudice the government's case against the accused.

Mr. Mayhew said there was certain information which could not be disclosed due to "crookedness" of this type was involved.

He said the prices board had had "considerable" difficulty with the coupon banking system and there were not sufficient safeguards of

BRITISH-CANADIAN TALKS ON LONG-TERM WHEAT CONTRACT HAVE BEEN SUSPENDED

OTTAWA.—High government sources said the suspension of British-Canadian talks on a long-term wheat contract arose from Canadian reluctance to make commitments for large-scale annual shipments and is not because of reported United States opposition to the proposed agreement.

These sources, in a position to have intimate knowledge of the negotiations, told The Canadian Press the Dominion government was reluctant to tie itself to an agreement involving wheat sales so large that they might, in the event of a future short crop, endanger Canada's position with other traditional customers.

At the same time, they added, Canada always had in mind the effect of any possible agreement on United States wheat interests and the long-term contract.

These authorities said there was no disagreement which could not be ironed out between the British and Canadian delegations on the price of grain, which likely would be at the present Canadian export rate of \$1.65 a bushel for a specified period and subject to later adjustment in the light of world prices and supplies at that time.

The main reason for the suspension,

was said to be the matter of quantities of grain to be delivered to Britain during the life of the contract, which unofficial reports had said would run for four or five years.

Before the war Canada sold Britain approximately 90,000,000 bushels annually. The figure now under consideration for the contract period is believed to be in the neighborhood of 150,000,000 bushels.

The Canadian position on the question of deliveries is said to be this:

"Canada feels that if she commits herself to sell Britain an excess of 150,000,000 bushels, she may find it difficult in a poor crop year that her total exportable surplus may total only that amount and she would have no wheat to meet the requirements of her other customers."

Then, if a bumper crop year followed, she may find that those customers have turned to other wheat-producing areas and she would be left with unsaleable surpluses on her hands."

There also was the possibility that the United Nations might work out some interim plan for the distribution of wheat and Canada would be unable to participate if she did not have a flexible margin of surplus with which to work.

ROYAL AERIAL INSPECTION.—The fly past of 300 R.A.F. aircraft over the saluting base to end the Victory parade in London is watched by the King, Queen and Princess Margaret Rose.

Members Of Parliament And Senators Pay High Tribute To Prime Minister King

WINNIPEG.—The great danger in Canada at present is that cost of production will become so high that Canadian goods will be unable to compete in world markets. Don G. McKenzie, chairman of the board of grain commissioners, said.

Mr. McKenzie told the annual meeting of the Canadian seed growers' association that Canadian exports now were worth from two to five times as much as they were before the war.

BEIRUT, Lebanon.—British troops have been withdrawing from the Lebanon according to plan during the last three months. British headquarters announced. Only 1,500 remain, the announcement said.

NOTES AND COMMENTS

TOURIST TRAVEL MAY REACH RECORD LEVEL

We have always maintained that when the American and Canadian governments were compared Mackenzie King's government led by a city block. This opinion was given an added boost this week when the States lifted the price ceiling on commodities. It would appear that before many days have past the United States will experience an inflationary spiral that will send prices sky high unless senators Barkley and Taft devise some program to dam the inflationary wave which is about to sweep over the country.

What does this mean to Canada? It means that Ottawa will have a severe headache in trying to hold tight its own price ceilings as the result of the added pressure caused by lack of price ceilings in the States. It also means that Canada may experience the greatest U.S. tourist boom in its history. The American dollar will be able to buy much more in Canada than it will in the States and it is natural to as-

sume that Americans will spend their holidays where their money will go the farthest. Ontario, for instance, is contemplating a \$200,000 tourist industry in 1946, more than the whole of Canada experienced in former years. Alberta, with its national parks and scenic beauty will share in this tourist boom. It is too bad her highways were not properly surfaced so that tourists coming here this year could truthfully say upon their return home that Alberta's highways were hard-surfaced from border to border and from park to park.

MEET THE TOURIST

We noticed in an exchange the other week where one town not far from here had changed its by-law governing service stations and garages so that the tourist traffic could be better served. One change was in the opening and closing hours.

In Coleman garages open at 8 a.m. Since the tourist is usually on his way long before 8 a.m. it is reasonable to believe that local garages are losing business. Why?

Teen Towners Column

(Millie Bubniak)

PARCEL ACKNOWLEDGEMENT

In 1941 and early 1942 the Coleman Girl Guide Company made a Layette, which was sent to Dominion headquarters, Ottawa, to be forwarded to Imperial headquarters in London. Here all the Guide parcels, from all over the world, were turned over to the Red Cross for distribution. Last week we received the following letter, from a lady in Holland, who has been given one of the articles in the parcel sent from Coleman. In 1942 we obtained the name of an Evacuee School in England, and from that time our parcels were sent direct to that address.

Veere, May 3rd, 1946.
Dear Friends,

I was very glad to receive a beautiful pink jacket through the intermediary of the Veere Relief Committee (Veersche Hulpcomite), for which I thank you very much indeed. It is awfully kind of you to have given this to unknown people over here. It is such a beautiful sort of wood. Here, no wool is still to be had, only artificial silk jackets and they are a very bad quality.

On March 31st our first baby was born; it is a son; he is rather small and thin, but he will grow and we are happy to have him. We had to evacuate at the time because of the inundations; my husband is a nursery-man. The water has been all over the place and our house is terribly damaged; we live now in the little village of Veere.

Most things are still rationed here with only a few exceptions and textiles are very scarce. We get coupons, but you cannot buy articles for them. It is a pity, but we'll hope for the best.

With my repeated thanks and with kind regards,

Yours sincerely,
N. GALJOUW, v.d. Bosse,
Wagenstraat A 92,
Veere (Zeeland),
Netherlands.
...V.

Rodeo Notes

Admission tickets will soon be off the presses and in the hands of the ticket committee. These admission tickets will be sold locally prior to the Rodeo and the committee stresses the importance of wearing these tickets in your lapel while attending the Rodeo. Failure to do so will result in you not being allowed to witness the Rodeo.

MICHEL-NATAL BRASS BAND will be in attendance all day as well as Coleman Pipe Band. The Michel-Natal band is composed of 50 pieces and should be one of the highlights of the parade.

The Parade Committee is negotiating with Col. T. E. Snow, D.O.C., Military District 13, to secure the Army "circus" of 23 motor powered mechanized units including guns, tanks, trucks, etc.

Since practically all businesses are at the helm of this stampede it is a pretty safe bet that all local stores will be closed on Saturday, Aug. 3.

THEATRE NOTES

PRIDE OF THE MARINES NOW PLAYING AT PALACE

Warner Bros. have long been known for presenting the truth. It started years ago, with a picture called "Confessions of a Nazi Spy" and their policy of combining good citizenship with good picture making has been continued. "Action in the North Atlantic," "Air Force," "Destry Tokyo," and "Objective Burma" all presented our war as it is being fought, without the sham of Hollywood heroics. Warner's newest film drama, "Pride of the Marines," currently playing at the Palace theatre, is a continuation of that policy. Starring John Garfield as courageous Al Schmidt, the one-man marine army, Eleanor Parker and Clark Dane, "Pride of the Marines" is a tender love story, a thrilling action and a true-to-life tale of that generation of Americans who came of age on December 7, 1941.

TELL AUDACIOUS STORY IN MOVIE RECORD BREAKER

"Scarlet Street," heralded as the most explosive cinema melodrama to emerge from Hollywood in recent seasons, is scheduled to open Saturday at the Cole Theatre. Edward G. Robinson and Joan Bennett are co-starred. Dan Duryea has the leading featured role. The same trio, it is recalled, scored emphatically in Fritz Lang's "The Woman in the Window." The same Fritz Lang directed and produced "Scarlet Street."

The new production, presented by Walter Wagner and released by Universal, is said to deal elementally with a man's uncontrolled infatuation and its tragic consequences.

'MURDER, HE SAYS' OFFERS MACMURRAY IN ZANY ROLE

"Murder, He Says," Paramount's screen presentation arriving Saturday at the Orpheum theatre, is preceded by a wealth of advance reports heralding this Fred MacMurray starer as the comedy to top all comedies.

So completely zany is "Murder, He Says," claim previewers, that theatres are bound to rock from the laughter. Theme of the story, apparently, bears out this prediction for it offers Fred as a poll-taker who's assignment is to test public opinion in a remote backwoods community. There, he meets the Fleagles, a rough and tumble shootin' family who have a fondness for feuding, whether it be with strangers or friends.

"FROM THIS DAY FORWARD" SATURDAY AT PALACE

Joan Fontaine emerges in one of her most brilliant roles as the young wife in RKO Radio's new romantic comedy-drama, "From This Day Forward." Playing opposite her is brilliant young Mark Stevens, in his first screen role of any consequence.

This story covers the married life of a young couple from 1937 to the present day. Susan and Bill Cummings are just an ordinary American couple. Susan has a job with a publisher and Bill is a tuck-lathe worker. Bill is determined that he and Susan shall have security when they marry. Susan's in-laws, the fantastic Beesley family do not have security, and as a consequence, life for them is just one domestic brawl after another.

With this example before him, Bill is for waiting, but Susan sets his fears at rest, and they are married.

SUGAR FOR CANNING

Second half of the ten-pound allotment of sugar for home canning will be available to consumers with the validating of sugar-preserves coupons S17 to S21, inclusive, on July 4, the Wartime Prices and Trade Board has announced. The first half of the allotment coupons, S8 to S12, inclusive, became valid on May 2. These ten coupons will be in addition to the two regular S coupons valid monthly.

Quota users who have permanent residents may also apply for sugar for canning in addition to their regular sugar preserves quota, provided they obtain S coupons from their residents. However, no coupons may be detached from the resident's ration book for this purpose without written authority from the bookholders. All letters of authority, forms for which may be obtained from a branch of the ration administration, must be attached to application.

LOCAL TENNIS PLAYERS LOST OUT TO CALGARY

Chick Roughhead and Duke Kwassnie travelled to Calgary on Sunday to challenge for the Cavaunagh Cup, emblematic of provincial tennis doubles supremacy.

They played the present holders Mills and Wallace and were defeated in three straight sets, 6-3, 6-2, 7-5.

Accompanying the two players were Mrs. Kwanzie and Ivor Morgan.

WM. KNIGHT BEREAVED

Wm. Knight received the sad news shortly after Wednesday noon, June 26, of the death of his father who collapsed from a heart seizure while engaged at his employment with the parcel department of the Lethbridge post office.

Legal Notice

IN THE ESTATE OF FRANK AL-
AMPL JUNIOR, late of Coleman,
Alberta, Miner, deceased.

NOTICE is hereby given that all persons having claims upon the estate of the above named Frank Al-
ampi, Junior, who died on the 17th day of May A.D. 1946, are required to file with the undersigned by the 22nd day of August, 1946, a full statement duly verified of their claims and of any securities held by them, and that after that date the administrator will distribute the assets of the deceased among the parties entitled thereto having regard only to the claims of which notice has been so filed or brought to his knowledge.

DATED at Blairmore, Alberta,
this 27th day of June, 1946.

T. J. COSTIGAN,
Solicitor for the Administrator,
Blairmore, Alberta,

A miscellaneous shower in honor of Mrs. J. Keener, nee Marjorie Erickson, was held at the home of Mrs. Myrtle George on Wednesday, June 26.

The evening was spent in playing cards with the honors going to Miss Audrey Root and Mrs. H. Hubert.

Following a dainty luncheon served by the hostesses, Mrs. R. Vincent, Mrs. Myrtle George, Mrs. A. Johnson, Miss E. Coccilone and Miss Audrey Root the honored guest was presented with many useful and beautiful gifts for which she ably expressed her thanks.

NOTICE

Mrs. T. B. Smith, Red Cross Work Room chairman, announces that the work room will be closed during the summer months.

WEDDINGS

DAILY—EGLENNSKY

On Thursday, June 6, at the Pro-Cathedral, Calgary, Mary, daughter of Mr. and Mrs. M. Eglenensky, of Two Hills, was united in marriage to Mr. Daniel J. Daly, youngest son of Mrs. M. Daly.

The bride, who was given in marriage by Mr. Walter Mills, Calgary, brother-in-law of the groom wore a dressmaker suit of brown gabardine with turquoise accessories and a corsage of yellow roses.

The attendants were Mr. and Mrs. Robert Bell, brother and sister-in-law of the groom.

A reception was held at the home of Mr. and Mrs. Walter Mills.

The happy couple left for Edmonton and the bride's home at Two Hills.

They have taken up residence at Coleman where the groom is employed.

MISCELLANEOUS SHOWER

A miscellaneous shower in honor of Mrs. J. Keener, nee Marjorie Erickson, was held at the home of Mrs. Myrtle George on Wednesday, June 26.

The evening was spent in playing cards with the honors going to Miss Audrey Root and Mrs. H. Hubert.

Following a dainty luncheon served by the hostesses, Mrs. R. Vincent, Mrs. Myrtle George, Mrs. A. Johnson, Miss E. Coccilone and Miss Audrey Root the honored guest was presented with many useful and beautiful gifts for which she ably expressed her thanks.

NOTICE

Mrs. T. B. Smith, Red Cross Work Room chairman, announces that the work room will be closed during the summer months.

CARD OF THANKS

I wish to express my sincere thanks to the hostesses, Mrs. R. Vincent, Mrs. Myrtle George, Mrs. A. Johnson, Miss E. Coccilone and Miss Audrey Root, for the miscellaneous shower sponsored by them in my honor and to the many friends who gave me gifts.

Mrs. J. Keener,
nee Marjorie Erickson.

Man-made bristles... Soaking
meat on the hoof... Weatherproof
ducks... Better fruit...

Here's a new brush that looks something like a question mark. But there is no question about it—their man-made bristles will outlast by many times the bristle of the Chinese Hog. This particular brush is for cleaning coffee makers. It is the only one of hundreds of new-type nylon brushes now coming on the market.

"All that you want" is the modern farmer's principle when it comes to providing salt for his livestock. With salt blocks or salt boxes in stable, barn, or garden areas, animals now help themselves, free choice, and grow faster, sturdier because of it. It's just another of the advances in animal nutrition that mark our times.

Durable water repellent that won't come out in washing or dry cleaning will soon be common in many outer garments. Not only will these give a longer wear, but clothes won't spot as easily. These products, such as "Velan" from England and "Zelan" from the U.S.A., are becoming well known to the people who are making the textiles for your new clothes.

Fruit that falls prematurely means waste to the orchardist. But chemistry knows a way to keep fruit on the tree until it's ready to be picked. With a hormone spray called "Parmone", which strengthens the stem of the fruit, "windfalls" can be almost eliminated.

Further information on any of these products is obtainable by writing to "Looking Ahead" at C.I.L., P.O. Box 10, Montreal, P.Q. 1/44-44-4

**"SO LONG,
MR. WHISKERS!"**

JOHNNY USED TO HAVE FUN blowing dandelions, but the pay-off came later when he had to dig out Mr. Whiskers' offspring from the lawn. Now, thanks to C-I-L and chemistry, he has his fun without work. His dad simply eliminates the new dandelions with a new hormone spray called "Herbate" 2, 4-D.

YES, DANDELIONS, plantain and many other weeds can be made to disappear, leaving the grass to take over unmolested. "Herbate" is one of the newest of new chemical products that make life more enjoyable :: for grown-ups as well as small boys.

WORLD HAPPENINGS BRIEFLY TOLD

Dr. Eduard Benes was unanimously re-elected president of Czechoslovakia.

N. M. Bentley of the Alberta school of agriculture, Vermilion, was elected president of the western Canadian society of agronomy.

A memorial plaque to the late Sun Yat-Sen, founder of the Chinese republic, was unveiled at the London boarding-house where he once stayed.

An estimated 900,000 unemployed persons in metropolitan Tokyo are to be registered and classified in the expectancy of the reopening of peace-time industries in the near future.

The British admiralty ordered the preservation as a memorial of "D-Day" the huge map used by the Allied officers to direct the invasion of Europe June 6, 1944.

Sen. L. M. Gouin (L., Quebec) called for special study by a Senate committee of how July 1 should be made into an adequate and appropriate holiday designed to further national unity.

Herbert Hoover reported an improvement in the world food outlook as a result of Latin American co-operation in making available 800,000 extra tons of cereals and beans for the next few critical months.

Canadian servicemen in the United Kingdom and Europe totalled 28,832 at June 1. It was reported in information tabbed in the commons. The army had 23,586; the navy, 475 and the air force 4,771.

Ice Cream

Form Of Seaweed Is Said To Enter Into Its Manufacture

Did you know that seaweed goes into the manufacture of your favorite ice cream?

This fact, however, is not as startling as it sounds. Sodium alginate, a chemical product derived from certain types of seaweeds harvested off the coast of British Columbia, California, Ireland and Scotland, forms an important ingredient of ice cream, according to an article in the current issue of C-L-T Oval.

A number of varieties of alginate products exist and a different seaweed gives different properties to the alginate acid or alginate made from it. The properties of the alginate manufactured from one weed species, however, are consistent and exactly reproducible, the article states.

Alginites are used wherever thickening, stabilizing and jelling properties are required—such as ice cream, chocolate milk and cold milk custards. These "seaweed" delicacies taste no different from those made with gelatin.

The article forecasts wide industrial use of alginites in textiles, paper coatings, transparent film, paints, cosmetics, pills and insecticidal compositions.

Increased Yield

Rust-Resistant Varieties of Wheat Have Paid Big Dividends

Manitoba produced 15,000,000 more bushels of wheat last year than a direct result of growing 1,000,000 acres of rust-resistant varieties, Dr. W. F. Hanna, chief of the Dominion plant pathology laboratory at Winnipeg, told the Canadian Seed Growers association.

Similar figures could be quoted for Saskatchewan yet the entire cost of the rust research program for the last 20 years did not exceed \$2,000,000.

Commenting on the reported exodus of Canadian trained personnel to the United States, Dr. Hanna said that unless more money was provided for research and research workers, progress was bound to be stalled.

Thanked For Help

Britain Appreciated The Efforts Of Canadian Women Said Viscountess Alexander

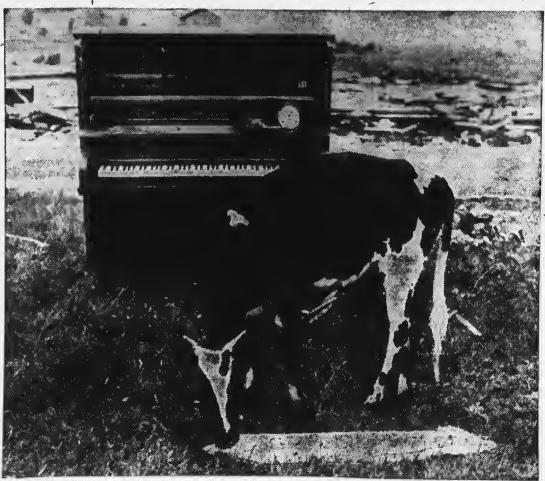

Large supplies of oranges and milk, large newspapers and envelopes which were used only once are details of Canadian life which impress anyone arriving from Britain. Viscountess Alexander said in speaking to the Ottawa Women's Canadian club.

The Governor-General's wife thanked the women of Canada for their help to Britain during the war. The Red Cross had helped to finance 100 war nurseries, the Junior Red Cross had sent comfort to the I.O.D.E. and seed clothing, the Kinship Club milk and the Queen's Canadian Fund kitchen utensils and household goods.

JOY SHORT-LIVED

Home folks like to tell you, if that's where the heart is. And—in that case—Tom Jenson of Stoughton, Wisconsin, was living in his mouth. He drove out on the edge of town to look at his newly completed house. It was beautiful. Fresh white paint, green shutters. New pine tree in the front yard. Everything wonderful . . . until Jenson peered around and noted the house was standing on someone else's property.

The use of pigeons as messengers goes back to 3500 B.C. 2679

WRECKAGE IN WAKE OF TWISTER AT WINDSOR TAKES QUEER SHAPES—Queer tricks were played by the twister which carried wreckage and debris for miles from the stricken area. This unusual setting for a piano doesn't seem to bother the calf which calmly continues grazing. Some animals were up to knees in water.

BEWARE SUMMER HAZARDS WARNS HEALTH WRITER

"It's our first peacetime summer—let's make the most of it," advises Jean Lambert in an article in the forthcoming summer issue of *Health*, official journal of the Health League of Canada.

Miss Lambert, assistant to the managing editor of *Health*, warns against excessive sunburn, poison ivy, undue fatigue, tells about the dangers of drinking untested water and unpasteurized milk, and advises vacationists to learn to swim "before you put on your own canoe."

In regard to sunburn, the writer advises that it takes a full two weeks to suntan safely. First exposure shouldn't exceed 10 minutes in the morning and 10 in the afternoon.

"Unless we realize that a sunburn is real burn—just as real as though we placed a hand on a sizzling hot stove—we're in for trouble," writes Miss Lambert, as she advises that, while many of the sun-tan lotions on the market help to prevent excessive burning, they are not a cure for burns.

Poison ivy looks like Virginia Creeper, but has three leaves instead of five. It is very irritating, growing mainly in waste places, especially at home in rich woodlands or near bathe houses. Miss Lambert warns that all parts of the plant—leaves, flower, fruit, bark or roots—are equally poisonous.

Miss Lambert says that this plant's poison can be carried by clothes which have come in contact with the plant, particularly if the clothes are damp at the time of contact. Animals walking through the plants also will carry it.

"If you do become involved with poison ivy, don't scratch, and remember that your greatest friend is cheap laundry soap, which gets down to business with the oily poison," advises the writer. "Use soap generously; scrub well with soap and water. Do this under running water several times."

The article warns against the drinking of water which appears clean but possibly could be contaminated. Water is a notorious vehicle for the transmission of serious diseases, but can be made safe by boiling or by chlorinating. Also, the common dipper should be avoided.

Water piped in from a municipality which tests and treats its water is safe, but if that water is put into a cooler, it must be purified in the same way as well or spring water. Home chlorinating outfits or information are available at most provincial departments of health.

Vacationists are advised against use of unpasteurized milk, and Miss Lambert suggests that home pasteurization methods be used if milk which must be pasteurized commercially is not available. These home methods can be obtained by writing to the Health League of Canada, 1 Avenue Rd., Toronto, or to your local department.

The article emphasizes that the use of milk in its raw state involves unnecessary risk because while milk is one of the best foods available, it unfortunately is easily contaminated by disease-dealing bacteria. This applies even to milk produced under the most sanitary conditions. Yes, even clean milk is not necessarily safe.

Making Progress

Vancouver Ex-Sailor Getting Along Fine On Canoe Trip

THE PAS, Man.—Tanned, quiet-spoken, O. P. Smith, Vancouver, arrived recently at this Saskatchewan River town, 500 miles north of Winnipeg, his canoe trip from Vancouver, New York half completed.

The middle-aged sailor placed his 16-foot craft in the Pas River April 11 and proceeded via the Churchill, Athabasca and Saskatchewan Rivers.

He carries with him a letter from the Mayor of Vancouver, addressed to Mayor O'Dwyer of New York, and he expects to deliver it within two months.

Mr. Smith plans to travel down Lake Winnipeg to the Winnipeg River, strike east toward Lake Nipissing, then cross southern Ontario to the Erie Canal. From New York, he may make a side trip to his birthplace at Calais, Ill.—by canoe or course.

Attract Tourists

Wins First Prize For Best Travel Exhibit At Minneapols

First prize for the best travel and tourist exhibits at the 13th annual Northwest Sportsmen's Show held in Minneapolis last April has been awarded to the Canadian Government Exhibition Commission, Leo Dolan, Canadian Travel Bureau chief, announced.

He estimated the exhibit, which already had been shown at Cleveland, Chicago, and Milwaukee, will be viewed by approximately 1,000,000 prospective American tourists this year. A section of it was on display at the Kiwanis International convention in Atlantic City.

Flax Seed Production

The Need For Flax Seed Still Is Urgent

Canada produces an excellent quality of flaxseed for all purposes but history shows that its production in the Dominion has been more or less a spasmodic undertaking. Production dates back to pioneer days, when 54,650 pounds of flaxseed were produced in New France in 1720. In 1864 production was stimulated at Baden, Ontario, by the preparation of flax products; and about 1875 flaxseed was first introduced into Western Canada. An area of over two million acres was grown in 1912 which, declining sharply during the First World War and post-war period, had fallen to a low level in the Thirties. In 1933 the flaxseed acreage and production dropped to the lowest level in over 20 years, the area sown amounting to 243,600 acres and the production to 632,000 bushels. At the outbreak of the Second World War Canada was still on an import basis as regards flaxseed.

Soon after 1939, a shortage of oil developed and supplies of linseed oil were diverted to uses not practical in normal periods. In order to stimulate production, the government set a price of \$2.25 per bushel with a subsidy of \$1.00 per bushel to encourage the delivery of flaxseed.

Production reached a record peak in 1943 when 2,947,000 acres were seeded to flax. In view of the urgent need, the fixed price was advanced to \$2.75 per bushel for the 1944 crop and \$3.25 for the 1945 crop. However, the 1944 crop was reduced to 9,668,000 bushels and in 1945 dropped further to a little over seven million bushels.

This history appears incidentally in "The Production of Flaxseed in Canada" by W. G. McGregor, Cereal Division, Experimental Farms Service and is published by the Dominion Department of Agriculture. In this publication (No. 545) important information is given about all phases of flaxseed production, including seed flax as compared with other crops, where flax may be grown, seed rates, harvesting, threshing, varieties, disease control, and insect pests. The market and the encouraging outlook for flax is also dealt with. A copy of the publication may be obtained by writing to Dominion Department of Agriculture, Ottawa.

Western Coal

B.C. And Alberta Mines Can Supply Million Tons For Central Canada

The British Columbia Government mines department officials expressed the belief that British Columbia and Alberta coal mines could supply 1,000,000 tons of coal for central Canada but the shipments by rail would not be economical.

To meet an emergency situation in the east, the Dominion Government ordered over 1,000,000 tons of western coal to be available for Ontario and Quebec this winter. Officials said the supplies would come mainly from Alberta and British Columbia.

To feel right — eat right

Alberta Coal

Discussion On The Moisture Content Is Settled

In the discussion which has been going on about Alberta coal, there has been some very dogmatic opinion given to the effect that the heavy moisture content of Alberta coal makes it unfit for long haulage and storage in Ontario. One grade of coal from Alberta is said to run as high as 14 per cent. in moisture content which is five times that of the coal from Pennsylvania.

There is an interesting letter on this subject in the Toronto morning paper from Mr. S. Clarry, Trade Commissioner of Alberta. He points out that domestic coal is now being shipped to Ontario from the Mountain Park area, Alberta, which has a moisture content of 1½ per cent. and that from the Cascade area is only one per cent. Mr. Clarry does not deny that some grades have a heavy wetness, but compares these grades to about the worst we get from Pennsylvania, and not infrequently at that, as many consumers know. The best of the Alberta product is better than the American coal, according to the Commissioner, if moisture content is the yardstick.

Production is not great enough at the present time to permit the shipment of large quantities to Ontario. The coal is there, however, in sufficient abundance. What is the main enemy? During the war with the enemy threatening the gate, we had a government performing a Herculean task and veritably moving mountains. Now the same government cannot move coal, Canadian coal, to the hard-pressed consumers of central Canada. Surely if this and that industry can be subsidized with public money, there is a strong case for the development of the hard coal resources in the West, lying now virtually untapped as far as Ontario is concerned. As things are, ten shiploads of Welsh or Scottish anthracite, or even British coal piled up in the Homer dock area would be a reassuring sight for consumers in this district. The condition for the coming winter points to stagnation, stagnation, because of strikes in mines and water transportation, and also higher costs. Coal is one commodity on which the War-time Prices Board must maintain the ceiling price, although inevitably it will be a higher ceiling.—S. Clarry.

Used Imagination

Farm Boy Opened Up New Market For Electric Drills

A young Colorado farm boy with imagination a sales manager should covet has brought new income to his state's apple producers and opened a new market for electric drills.

The boy equipped a drill with a special arbor and felt part to polish apples; now farmers have copied his stunt, get higher prices for their fresh, high-sheen apples. The drills have been agricultural implements without a nickel of promotion.—Modern Industry.

Bread baking is one of the most ancient of human arts.

OUR COMPLETE SHORT STORY—

Tale Of A Mouse

By M. J. COLLINS

Copyright
Wheeler Newspaper Syndicate

STAN JACKSON owned the service station beside the pine grove a few miles outside the town. It was a good location and Stan made a fair living. He was a happy-go-lucky sort and everyone liked him, but he had one great fault. He loved to talk. To anyone and everyone, about anything. Once he got started it was hard to head him off. Mice were his pet subject at that moment, and he claimed if everyone started to catch them systematically, the country would be saved a million every year.

This was Saturday and he'd been busy all day, and so had the cash register.

"What's goin' on now?" Highway Patrolman Clancy Burke asked as he stepped into the service station.

Stan stepped from the corner where he was bent over fixing something. "I'm trying to catch a mouse," he answered, "and having a time of it, too!"

"Tryin' to save a million dollars," he said. "Clancy laughed.

Stan straightened up and opened his mouth to say something, but Clancy cut him short with, "I know, you told me before, and before that also, so I'm almost just as much an expert on the subject as you are."

A sheepish grin spread over Stan's face. "Guess I do talk a mite too much, he admitted.

"Listen, Stan," Clancy's mood turned serious. "There has been a lot of service stations robbed lately, youngsters seem to be at the racket, so don't leave too much cash lying around."

"Oh, they'd never bother with a place like this. Stan's mind wasn't on Clancy's warning. "Now if I could only catch that mouse," Clancy thought.

The next few hours were busy ones for Stan. The farmers, in town for the evening, were his main customers, but now that the weather was cool, Stan was well past mid-night when he moved himself into his rocking chair for a look over the newspaper. "I'll stay open till one o'clock just in case there are a few more to come, he thought.

Hardly had he settled down when there was a "snap". "Ah," he cried. "I've got you this time!" Jumping to his feet, he rushed back to the corner. He pushed the box aside, but the mouse was gone, and so was the cheese. Perplexed, Stan scratched his head, suddenly he had put it over him for almost a week. Getting another bit of cheese he re-set and placed the trap in position. As he turned around the mouse scurried back into a hole in the opposite wall.

"I'll get you yet," he muttered, shaking a fist at it, and picked up his paper.

The car grinding to a stop woke him up. Before he was out of the chair, the door opened and a man stepped in, closely followed by a girl. "Good evening," Stan said, starting to move behind the counter. The man looked hard and grim.

"Stand where you are!" The voice sent chills up and down Stan's spine. "Put your hands."

A small automatic's ugly snout was pointing where Stan had always considered his heart was. "Right now it was pointing in his mouth. His hands were up with all possible speed. "Wise guy," the man sneered.

The cash register sat on the counter at the opposite end, and Stan's eyes stole toward it. There was almost two hundred dollars in it.

"Take it easy, buddy," the man laughed. "It's going to help the poor, eh babe?" he said to the girl.

"Yeah," from the corner of her flaming mouth.

If Clancy were only here. Stan's ears were straining for the sound of the motorcycle.

"Here," the man said curiously, "hold the gun on him." She took it while he emptied the register.

To the sight of his vanishing money Stan set red.

"Don't try it, sap!" the woman said coldly.

A pair of small, beady eyes stared out of a hole in the wall. The mouse started to run across the floor. The girl screamed and dropping the gun, scrambled up on a chair.

Cursing, the man turned. All the fury in Stan's fist crashed into his face. He went crashing into the wall and slumped to the floor.

In the excitement the sound of the motorcycle had gone unnoticed. Clancy had stepped inside, surveyed the scene and quietly asked, "What goes on?"

Stan heaved a sigh of relief. "You're just in time."

"I think so," Clancy said dryly, taking the gun out of the thief's hand, "This night go off and damage someone." And as an afterthought, "even you."

The two would-be thieves had been taken away. Stan and Clancy were in the back drinking coffee.

NNOR ROTENONE SPRAY

A remarkable new compound insecticide spray with tremendous killing power against spiders, leaf hoppers, mealy bugs, thrips and other insects attacking fruit trees, shrubs, flowers, greenhouse plants and certain types of fruit stock. An excellent replacement in many instances for nicotine sulphate. In 1 quart, 5 oz., 16 oz. and 1 gallon.

Trademark Regd.

AT YOUR LOCAL DEALER

Clancy asked, "Just how did you get the drop on them?"

"Well," he replied, "he handed the gun to the girl. Mighosh, wait!" he cried, rushing out to the front. In a few seconds he was back. "Look at this," holding up the trap. The mouse was pinned by the tail.

"Ah! Success!" Clancy chuckled. Setting the trap on the floor, Stan released the mouse.

"What in the world do you do for?" Clancy asked.

"The mouse proved my argument," Stan beamed. "It saved the country hundred dollars."

COMEDIAN KILLED — An automobile accident proved fatal for Charlie Butterworth, Eng. Princess Elizabeth shared the emotion of a fan on flypaper after viewing members of the Imperial Territorial Service, the women's division of the army, at the Imperial Staff College.

She literally stuck to the reviewing platform freshly painted in her honor and left sticky white footprints across the parade ground when she walked.

Pattern 4832 comes in Teen-age sizes 10, 12, 14 and 16. Size 12, 24, 30, 36 inches long, and two twenty-fourths (20c) in coins (stamps cannot be accepted) for this pattern. Write plainly Name, Address and Style Number and send orders to Anne Adams Pattern Dept., Winnipeg Newspaper Union, 178 McDermot Ave. E., Winnipeg, Man.

FEWER SHEEP

The Effect Of The War On Sheep Flocks

The numbers of sheep in the world have been reduced about 12 per cent. to approximately 38 per cent. of pre-war status, according to Abramis, director, Department of Agriculture. Heavy wartime damage occurred in the Soviet Union where 27 million sheep and goats were lost out of 102½ million pre-war flock, leaving about 74 per cent. intact. Most of the Soviet Union's sheep are reared on the steppes of Asia which explains the relatively less serious injury to sheep and goats than to the other classes of livestock. The natural increase of these flocks, together with the acquisitions from occupied countries may bring the sheep and goat numbers up to within 15 per cent. or so of pre-war by the middle of 1946.

Sheep in occupied countries are very serious. Sheep are easily driven on foot and require little feed except grazing while in transit. For example, it is estimated that about 86 per cent. of the sheep in Hungary had been removed by the end of the war. By August, 1945, another decline was noted, and the process seemed to be continuing.

Europe as a whole, excepting the Soviet Union, is estimated to have preserved 76 per cent. of the pre-war flock. In countries which have not suffered extensive war damage, the maintenance of sheep was easier than that of hogs, because sheep can subsist largely on grass. Nevertheless, preference for milk production instead of meat caused the sheep flock to grow much faster than cattle herds.

Outside of Europe, sheep numbers increased only in South America. There was a decrease to 93 per cent. of pre-war in Oceania and to 86 per cent. in North America. Taking advantage of the decrease in those two important areas (which concentrated upon beef and pork) and also through the sustained British demand, South America increased sheep flocks to 114 per cent. of the pre-war. A large part of the increase occurred in Argentina, where ample pastures are available.

SMILE AWHILE

"You are lying so clumsily," said the judge to the defendant, "That I would advise you to get a lawyer."

"Please, sir, I don't like the soup, sir."

"Nonsense," said the officer, briefly. "That soup is good for you. It's full of vitamins."

"There," said the next private in a triumphant whisper. "I told you they wasn't flies."

A BIG BUSINESS

Canada's Poultry Industry Is Made Up Of Small Businesses

The poultry industry in Canada has become big business. It is made up, however, of a multitude of small businesses. It is in the continued success or non-success of these individual businesses that the story of the future will be written, says the Egg and Poultry Market Report, Dominion Department of Agriculture. Heavy wartime damage occurred in the Soviet Union where 27 million sheep and goats were lost out of 102½ million pre-war flock, leaving about 74 per cent. intact. Most of the Soviet Union's sheep are reared on the steppes of Asia which explains the relatively less serious injury to sheep and goats than to the other classes of livestock. The natural increase of these flocks, together with the acquisitions from occupied countries may bring the sheep and goat numbers up to within 15 per cent. or so of pre-war by the middle of 1946.

In poultry management, there are some things often overlooked, such as grass, earthworms, water, air, light, earth, and exercise. Grass is the most readily available source of vegetable protein and essential nutrients for poultry, and animal protein is easily obtainable in earthworms. Only one or two species of earthworms may carry poultry diseases. They can be avoided. Water is almost more important than feed. From their peculiar structure poultry suffer more readily from lack of water than from lack of feed. Light is essential especially in the fall and winter. High production stock needs to produce well. Concerning earth, there are virtues in good earth and contentment for the birds in a dust bath, and in good poultry management. It is a maxim, that growing stock should be obliged to range for part of its ration. — St. Thomas Times-Journal.

Cheap Food

Era Is At An End If Cost Of Production Goes Up

The end of the era of cheap food in Canada was predicted by R. C. Smellie, president of The National Dairy Council, in an address prepared for delivery before the Ottawa Rotary club.

"I doubt very much if we can continue to have cheap food and at the same time expect the farmer to pay high wages and high prices for the things he must buy," Mr. Smellie said.

Canadians were eating more good food now than before the war. They became accustomed to cheap food in the depression years, and wartime price controls had kept food prices down. Canadian farms were producing more milk than ever before, and the dairy industry had a great future, if production could be increased.

New processes made it possible for Canada to export dairy products anywhere in the world, but production was not enough to supply all the nation's needs and export also.

Mr. Smellie forecasted their standard of living they would require more dairy products, but with the rise of prices and wages, the farmer must ask higher prices, Mr. Smellie said. The only way to keep food prices down was by reducing the cost of labor and equipment.—Ottawa Citizen.

PARTY LEADER WOUNDED—Pandit Nehru, Indian Congress party leader, who recently was wounded in the chest by a sentry's bayonet when he attempted to enter the state of Kashmir.

Comes From Rich Soil

Fertilizer Needed To Ensure Growing Of High Protein Wheat

From Kansas comes a warning that the continual removal of soil fertility from wheat land is lowering the protein content of the wheat with the result that millers are warning growers they must do something to restore soil fertility. Greater use of artificial fertilizers is suggested.

In Western Canada the high protein wheat comes from the very rich soil of the plains area. It has been suggested many times that low protein wheat should be grown on a large basis in order that world importers might not get low protein grain when they think they are buying high protein wheats such as come from the plains area where short rainfall makes for a higher protein content.

However, the Kansas experience should be noted in the plains area. We must not expect to continue taking fertility out of the soil year after year and returning nothing if we expect to continue to grow high protein wheat which is wanted by flour millers everywhere. We have the combination of weather and soil to make hard wheat. We can do much about the weather but we can do what is necessary to maintain soil fertility.—Lethbridge Herald.

As a result, hundreds of women are being brought in from the prairie provinces to pick the berries with the government paying their fare. Meanwhile, Vancouver's jobless stay right where they are, waiting for something to turn up. Something, that is, to their liking.—Calgary Herald.

Could Be Regulated

People In Canada Would Not Suffer From Breadless Days

As there are meatless days there could be breadless days. It could be ordered, as an alternative, that no more than one slice of bread or one roll be served to any customer with a full meal, and that only on specific request. Back of this there might be control of the amount of bread or flour available to the caterers.

Waste of bread in the home is much harder to control, without rationing, but the restaurants should not offer any great difficulty if the authorities will attack the problem zealously. Certainly it is shocking that recklessly we should throw good food into the garbage pail while millions of our fellow-humans are in dire need of it.—Ottawa Journal.

MAKES GOOD PET

GRAND VALLEY, Ont.—Most Ontario farmers are sworn enemies of groundhogs—but Jack Clegg, who farms near this Dufferin county village, caught one and tried it out as a pet. Now it roams the farm at will, comes when whistled and plays with the family dog.

A Cultural Centre

Switzerland Untouched by the Urgent Post-war Problems Absorbing Most European Countries, Is Making A Good Job Of Being The Cultural Centre Of Europe, A Junction Of French, German, Italian and British Civilizations.

The year the Swiss are organizing theatrical and musical festivals of a standard hardly ever equalled in Europe.

Besides leading a calm pre-war way of life, Switzerland is ideally situated geographically for such a meeting ground. French, German and Italian are the three recognized national languages. English is widely understood.

The POTATO CROP

From present indications the potato crop in Canada for 1946 will be 23 per cent. above the 1945 crop. Based on the farmers' intention to plant and an average yield per acre, the outlook is for a crop of 74,000,000 bushels. The 1945 crop was 59,976,000 bushels.

Sinus Sufferers

GET QUICK RELIEF

Lieutenant General Sir Alexander G. McNaughton, Minister of National Defence, has issued a circular to all medical officers and nurses in the Canadian Forces, asking them to assist in the relief of sinus sufferers.

The circular states that the use of mentholatum, a well-known sinus remedy, has been found to be effective in relieving sinus trouble.

It is recommended that the following directions be followed:

LOCAL NEWS

Bob Phillips has returned home following a trip to Vancouver.

Mr. and Mrs. Sist, Sixth street, visited at Kimberley at the week end.

Mrs. M. W. Ferguson left during the week for a vacation at Vancouver.

Jimmy Slugg and Johnny Rypien were Kimberley visitors at the week end.

David Smith, of Calgary, visited his parents, Mr. and Mrs. O. Smith, at the week end.

Miss Joan Naylor left on Tuesday morning's train for Nelson where she will visit her sister.

Miss Anne Yuill left on Sunday for California where she will spend her vacation with a sister.

Miss Edna Fairhurst, of Calgary, visited her parents, Mr. and Mrs. James Fairhurst at the week end.

Miss Muriel Naylor, of Calgary, was the week and holiday guest of her parents, Mr. and Mrs. J. Nayor.

Miss Marion Bamling, of Lethbridge, visited her parents, Mr. and Mrs. John Bamling, at the week end.

Mr. and Mrs. Tom McGregor, of Vancouver, are the guests of their daughter, Mrs. Roy Upton and Mr. Upton.

Mr. and Mrs. John McNeil and family and Mr. and Mrs. Neil McKinnon motored to Waterton on July 1.

Mrs. A. Walker, of Vancouver, is the guest of her son and daughter-in-law, Mr. and Mrs. James Walker.

Mrs. J Parker and two daughters of Fernie, have been the guests of Mr. and Mrs. R. Holmes during the week.

Miss A. Mercier and Mr. Jim Cousins, local high school teachers are in Edmonton this week marking examination papers.

Tommy Sudworth, accompanied by his cousin, Miss Doris Jackson, of Calgary, have left to spend a vacation at Vancouver.

Mr. James Cousins and family are spending a month at Ipswich, Alberta, where they are the guests of the former's parents.

Mr. and Mrs. Neil Nilsson and daughter, of Trail, are the guests of Mrs. Nilsson's sister, Mrs. Nick Nicholas, and Mr. Nicholas.

Mr. and Mrs. Lewis Jones have returned from a vacation spent at Banff. While at the mountain resort they met Arthur Westworth and his bride.

Mr. and Mrs. Havelock Hulbert, Shirley, Vans and Vince, Roy Bedington Jr., Chrissie Stewart and Bill Noton spent the week end at McBains Lake.

Mr. and Mrs. R. Makin and family, accompanied by Miss Marion Sheney, of Lethbridge, were the week end guests of Mr. and Mrs. Dave Sudworth.

Mr. and Mrs. R. Gillies and Mr. and Mrs. Neil Fleming Jr., and family, Lorraine Gillies and Mr. and Mrs. A. Balloch and family visited at Waterton on July 1.

Mrs. William Kinneir and baby are scheduled to leave tomorrow by TCA to Vancouver and then to Seattle where she will visit her parents, Mr. and Mrs. Peter Campbell.

Mr. and Mrs. Joe Melusi, Miss Annie Dudy and brother Bruno, and Miss Dorothy Haluka motored to Kimberley, Cranbrook and McBaines Lake at the holiday week end.

Mr. and Mrs. James Naylor will leave this week end on a vacation which will see them visit Vancouver and enroute home they will visit their daughters at Trail and Ainsworth.

Mr. and Mrs. O. Smith, David, Mr. and Mrs. Jack Rogers and Mr. and Mrs. E. Fontaine and daughter, motored to Kimberley at the week end when they were guests of Mr. and Mrs. L. Sanderson.

The Journal acknowledges with thanks renewal subscriptions received from Mr. Charlie McKinnon, of Banff, who sends along his best wishes to his many Coleman friends and Mrs. W. C. Wells, of Port Kells, BC, who also sends best regards to her many friends in Coleman, also to Mr. George Fisher, Natal, old-timer.

Miss Helen Zufka, of Calgary, is the guest of her parents.

Gordon Roper is spending the summer vacation at Waterton.

Miss Mary Kovacik is spending two weeks vacation at Edmonton.
